Report to the Shareholders

The second quarter, despite reflecting a decline in sales and profitability, has seen the successful realization of several pipeline initiatives that are set to bring value-added benefits to our operations and finance. Considering the complexities of the supply chain, logistics, material availability, and global competition, we embarked on a mission to leverage our key resources to maximize output and efficiency.

Operations: We have made significant strides in enhancing our operations by identifying new suppliers and innovative materials, broadening our range of offerings to customers, and improving our pricing to increase competitiveness. Additionally, the acquisition of technologically advanced machinery has bolstered operational efficiency, leading to improved productivity. Research conducted on production processes within our industry enabled us to optimize our assembly line, maximizing timelines, volume, and overall efficiency.

Furthermore, the successful purchase and implementation of an Enterprise Resource Planning (ERP) system anticipated to come onstream by 1^{st} quarter of 2024 will automate and manage our core business processes and streamline operations for optimum performance.

Revenue Generation: Additional Sales Representatives are coming onstream to steer more job opportunities and drive sales growth. By expanding our sales team, we'll increase our capacity to engage with potential clients, showcase our offerings, and secure more contracts. This strategic move will allow us to tap into new markets and capitalize on untapped industries.

Marketing Initiatives and Brand Visibility: In recognizing the importance of making ourselves more visible to the public, we are exploring marketing initiatives to enhance brand visibility and awareness. We intend to hire a marketing professional to develop and execute targeted marketing campaigns that showcase our expertise, products, and services to potential customers. These efforts will position us as a leader in our industry and increase recognition and trust among our target audience.

Summary: As we move forward, we remain focused on continuous improvement, innovation, and responsible business practices to achieve our long-term goals and secure a prosperous future for JFP.

Profit and Loss

The board of directors is pleased to present the unaudited results of JFP Limited (the "company") for the six-month period ended June 30, 2023

Quarterly

Revenue: Despite moderate sales thus far in the year, JFP has faced challenges in completing and delivering jobs due to factors beyond the company's control, including material availability, logistics challenges and client design revisions. As a result, revenue declined by 28% compared to the second quarter of 2022.

Manufacturing: While the cost of sales increased by 4%, the gross profit experienced a 45% decline, leading to a decrease in gross profit margin from 66% to 51%. Our team is actively working to address the cost structure and operational inefficiencies to improve profitability.

Expenses: Administrative expenses remained relatively stable increasing by only 1%.

Selling and distribution expenses declined by 54%. This reduction is attributed to the decline in sales and subsequent reduction in sales-related commissions paid to external sales representatives.

Moving forward, we remain committed to addressing the challenges that impacted sales and profitability. Our strategic initiatives and investments in technology and operational efficiency are expected to yield positive results in the upcoming quarters. With an ongoing focus on innovation, customer satisfaction and cost management, we aim to improve overall performance and position ourselves for sustainable growth in a highly competitive market.

Year to date

JFP experienced a decline in sales and recorded revenue at 150M, a 30% decline over the previous year. Gross profit margin declined from 68% to 53%.

Other income declined by 92% due mainly to decline in the value of equity shares held.

Administrative expenses increased by 9%. Selling and distribution expenses continue to mirror a decline in sales totalling 6.7M which represents a decline of 43% over the previous year.

Profit declined by 208% resulting in a net loss of 38M.

Balance Sheet

Property, plant and equipment increased by 29% compared to the same period last year. This was as a result of the purchase of an Edgebanding machine valued at USD 94K. This machine has already increased the efficiency of production by significantly reducing timelines and making the process more automated.

There was an increase in inventory due mainly to work in progress and also the continued need to guard against shortages in inventory that might prevent the company from meeting customers' needs on time.

Receivables remained relatively stable with a slight increase of 1%.

Cash and cash equivalents increased by 678%. The funds held at GK were previously categorized solely as investment but was later reclassified into equity and cash resulting in a higher cash value.

Payables remained relatively stable increasing by 1%.

Shareholder's equity declined by 28% compared to the same period last year due to losses made in the last three quarters.

We are appreciative to our employees, shareholders and all our supportive customers, suppliers and other stakeholders for their unwavering commitment to our brand.
